

**IN THE CLAIMS**

The following is a complete listing of claims with a status identifier in parenthesis.

**LISTING OF CLAIMS**

1. (Currently Amended) A method for configuring a wireless device comprising:  
displaying ~~wireless device~~ settings of a separate wireless device;  
transmitting selected ~~wireless device~~ settings to a wireless service provider.
2. (Currently Amended) The method as in claim 1 further comprising transmitting  
the substantially same settings to the separate [[a]] wireless device.
3. (Currently Amended) The method as in claim 2 wherein the separate wireless  
device comprises a cellular telephone.
4. (Currently Amended) The method as in claim 2 wherein the separate wireless  
device comprises a cordless telephone.
5. (Original) The method as in claim 1 wherein displaying comprises displaying  
the settings within a web page.
6. (Original) The method as in claim 1 wherein displaying comprises displaying  
the settings within an e-mail menu.
7. (Original) The method as in claim 1 wherein displaying comprises displaying  
the settings within a PDA menu.
8. (Original) The method as in claim 1 wherein displaying comprises displaying  
the settings within a wireless device menu.
9. (Original) The method as in claim 2 wherein transmitting comprises  
transmitting the selected settings according to a schedule.

10. (Currently Amended) The method as in claim 2 wherein transmitting comprises repeatedly transmitting the selected settings until the separate wireless device receives the transmission.

11. (Currently Amended) The method as in claim 2 wherein the selected settings are transmitted to a separate wireless device identified by a wireless device communications number.

12. (Original) The method as in claim 11 wherein the communications number comprises a telephone number.

13. (Original) The method as in claim 1 wherein the selected settings comprise an existing configuration.

14. (Original) The method as in claim 1 wherein the selected settings comprise a new configuration.

15. (Original) The method as in claim 1 wherein the selected settings comprise cellular telephone settings.

16. (Original) The method as in claim 1 wherein the selected settings comprise cordless telephone settings.

17. (Currently Amended) A system for configuring a wireless device comprising:  
a configuration interface adapted to display ~~wireless device~~ settings of a separate wireless device and to transmit selected ~~wireless device~~ settings to a wireless service provider.

18. (Currently Amended) The system as in claim 17 further comprising a wireless service provider adapted to transmit substantially the same selected settings to the separate [[a]] wireless device.

19. (Currently Amended) The system as in claim 18 wherein the separate wireless device comprises a cellular telephone.

20. (Currently Amended) The system as in claim 18 wherein the separate wireless device comprises a cordless telephone.

21. (Original) The system as in claim 17 wherein the interface is adapted to display the settings within a web page.

22. (Original) The system as in claim 17 wherein the interface is adapted to display the settings within an e-mail menu.

23. (Original) The system as in claim 17 wherein the interface is adapted to display the settings within a PDA menu.

24. (Original) The system as in claim 17 wherein the interface is adapted to display the settings within a wireless device menu.

25. (Original) The system as in claim 18 wherein the provider is adapted to transmit the selected settings according to a schedule.

26. (Currently Amended) The system as in claim 18 wherein the provider is adapted to repeatedly transmit the selected settings until the separate wireless device receives the transmission.

27. (Currently Amended) The system as in claim 18 wherein the provider is adapted to transmit the selected settings to the separate wireless device upon receiving a wireless device communications number which identifies the wireless device.

28. (Original) The system as in claim 27 wherein the communications number comprises a telephone number.

29. (Original) The system as in claim 17 wherein the selected settings comprise an existing configuration.

30. (Original) The system as in claim 17 wherein the selected settings comprise a new configuration.

31. (Original) The system as in claim 17 wherein the selected settings comprise cellular telephone settings.

32. (Original) The system as in claim 17 wherein the selected settings comprise cordless telephone settings.

33. (Currently Amended) A method for configuring a wireless device comprising:  
displaying ~~wireless device~~ settings of a separate wireless device;  
transmitting selected wireless device settings to the separate [[a]] wireless device.

34. (Currently Amended) The method as in claim 33 wherein the separate wireless device comprises a cellular telephone.

35. (Currently Amended) The method as in claim 33 wherein the separate wireless device comprises a cordless telephone.

36. (Original) The method as in claim 33 wherein displaying comprises displaying the settings within a web page.

37. (Original) The method as in claim 33 wherein displaying comprises displaying the settings within an e-mail menu.

38. (Original) The method as in claim 33 wherein displaying comprises displaying the settings within a PDA menu.

39. (Original) The method as in claim 33 wherein displaying comprises displaying the settings within a wireless device menu.

40. (Original) The method as in claim 33 wherein transmitting comprises transmitting the selected settings according to a schedule.

41. (Currently Amended) The method as in claim 33 wherein transmitting comprises repeatedly transmitting the selected settings until the separate wireless device receives the transmission.

42. (Currently Amended) The method as in claim 33 wherein the selected settings are transmitted to a separate wireless device identified by a wireless device communications number.

43. (Original) The method as in claim 42 wherein the communications number comprises a telephone number.

44. (Original) The method as in claim 33 wherein the selected settings comprise an existing configuration.

45. (Original) The method as in claim 33 wherein the selected settings comprise a new configuration.

46. (Original) The method as in claim 33 wherein the selected settings comprise cellular telephone settings.

47. (Original) The method as in claim 33 wherein the selected settings comprise cordless telephone settings.

48. (Currently Amended) A system for configuring a wireless device comprising:  
a configuration interface adapted to display ~~wireless device~~ settings for a separate wireless device and to transmit selected wireless device settings to the separate [[a]] wireless device.

49. (Currently Amended) The system as in claim 48 wherein the separate wireless device comprises a cellular telephone.

50. (Currently Amended) The system as in claim 48 wherein the separate wireless device comprises a cordless telephone.

51. (Original) The system as in claim 48 wherein the interface is adapted to display the settings within a web page.

52. (Original) The system as in claim 48 wherein the interface is adapted to display the settings within an e-mail menu.

53. (Original) The system as in claim 48 wherein the interface is adapted to display the settings within a PDA menu.

54. (Original) The system as in claim 48 wherein the interface is adapted to display the settings within a wireless device menu.

55. (Original) The system as in claim 48 wherein the interface is adapted to transmit the selected settings according to a schedule.

56. (Currently Amended) The system as in claim 48 wherein the interface is adapted to repeatedly transmit the selected settings until the separate wireless device receives the transmission.

57. (Currently Amended) The system as in claim 48 wherein the interface is adapted to transmit the selected settings to the separate wireless device upon receiving a wireless device communications number which identifies the wireless device.

58. (Original) The system as in claim 57 wherein the communications number comprises a telephone number.

59. (Original) The system as in claim 48 wherein the selected settings comprise an existing configuration.

60. (Original) The system as in claim 48 wherein the selected settings comprise a new configuration.

61. (Original) The system as in claim 48 wherein the selected settings comprise cellular telephone settings.

62. (Original) The system as in claim 48 wherein the selected settings comprise cordless telephone settings.
